PROFILE

Computer Science & Game Development graduate with hands-on experience building real-time Unity environments, HDRP lighting/rendering, terrain sculpting, and XR simulations. Currently a Junior XR Developer designing immersive training environments and interactive systems. Seeking a Master's degree to deepen technical and research-oriented expertise in game development and game design.

CORE SKILLS

Engines & Rendering: Unity (HDRP, URP), Unreal Engine, Real-time Lighting & Rendering

Environment & Level Art: Terrain Sculpting, Environment Design, Level Design, World Building

Programming: C#, Gameplay Systems, Unity Physics & Animation

XR / Immersive Tech: XR Interaction Toolkit, VR Simulation Development, Interactive UI Systems

Tools: Blender, Adobe Photoshop, Figma, Web Development

WORK EXPERIENCE

Jr. XR Developer | Edgeforce Solutions — On-site, Hyderabad Aug 2025 – Present

- Build real-time Unity environments, applying terrain sculpting and environmental design to production-quality standards.
- Design and optimize immersive VR environments for simulation training.
- Collaborate with designers and developers to create intuitive, interactive VR systems.

XR Developer Intern | Edgeforce Solutions — On-site, Hyderabad Feb 2025 – Jul 2025

- Worked on a VR Driving Simulator built in Unity using the XR Interaction Toolkit.
- Designed and built 3 distinct VR environments for immersive driving experiences.
- Developed interactive UI systems, gaining strong experience in VR interaction design.

Game Developer | PlatypusBox — Remote Nov 2024 – Feb 2025

- Developed 'Fighter Game' in Unity, implementing combat mechanics and player controls.
- Contributed to gameplay logic and level design, ensuring smooth player interaction.
- Deepened understanding of Unity physics, animation systems, and performance optimization.

PROJECTS

Elemental Strike — Third-Person Shooter

- Developed a 3-level TPS game in Unity 3D with shooting, ADS, and movement systems.
- Built immersive environments and optimized performance for smoother gameplay.

Frostfall Challengers — 3D Puzzle Game

- Created a winter-themed 3D puzzle game with a cartoon art style.
- Designed logical puzzles and smooth mechanics to enhance player engagement.

Dark Ninja — 2D Platformer

- Built a 2D platformer with a dark-themed ninja setting.
- Integrated enemy AI, obstacle traversal, and atmospheric lighting.

Forest Flab Run — Endless Runner

- Designed an endless runner featuring a humorous character in a forest setting.
- Implemented jumping, dodging, and coin-collection systems.

EDUCATION

BSc (Hons) Computer Science & Game Development 2021 – 2024

ICAT Design and Media College, Hyderabad | CGPA: 7.8
